

# Safety safe your life

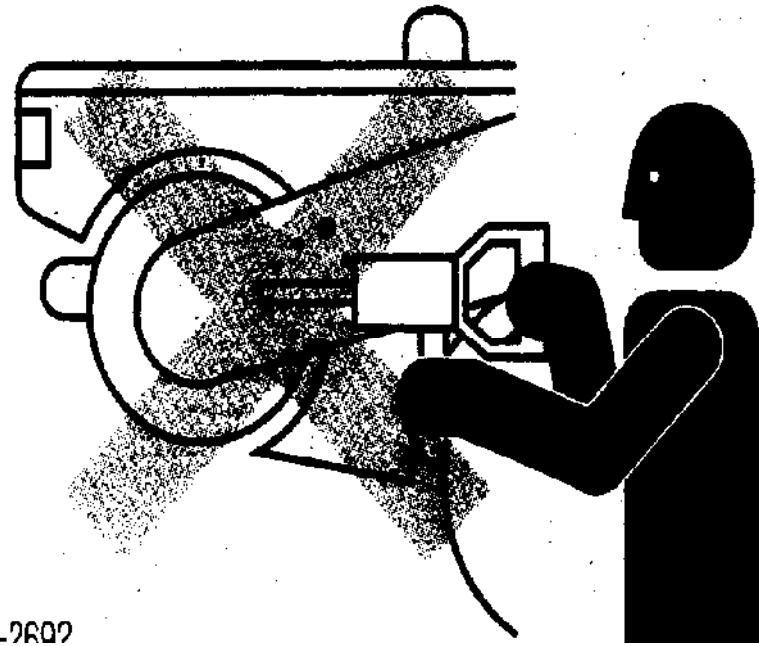

I 1325

2690

Prepare yourself for any check up  
before you start the engine.

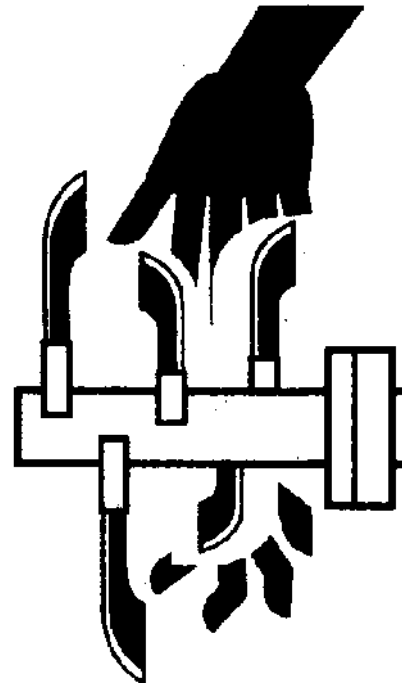

1-7R07

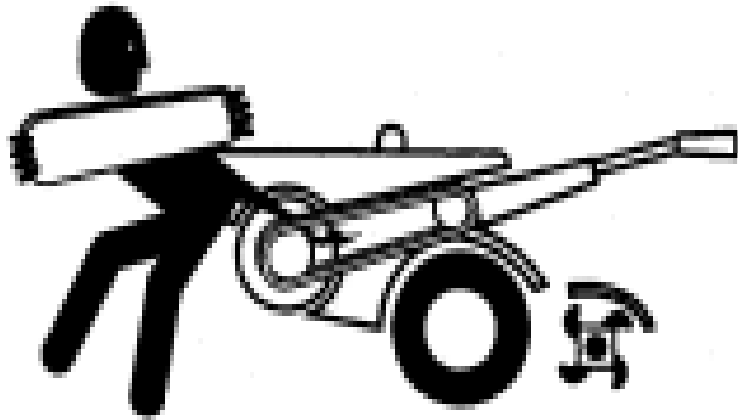

Caution please

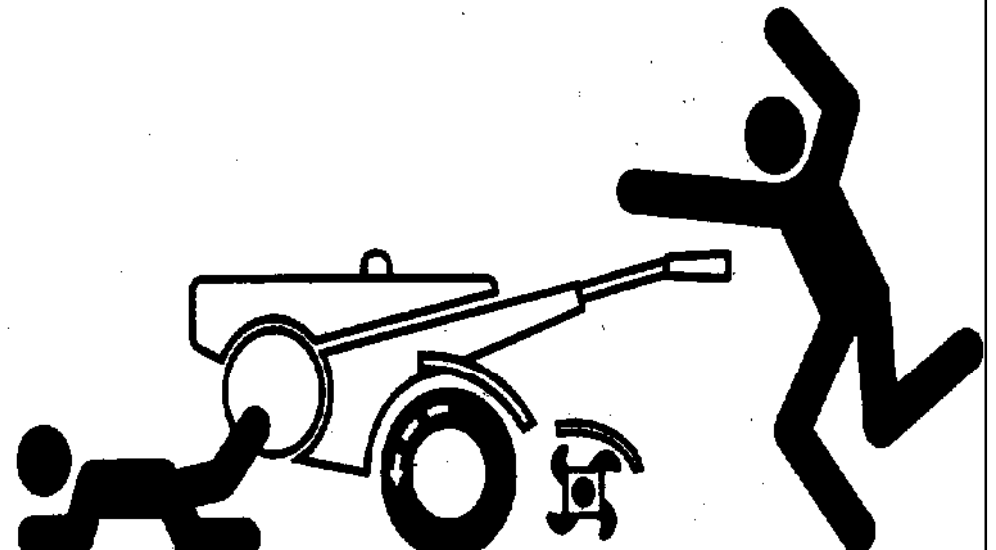

Beware, always stop to check the belts.

Please stop the engine or else you must do the necessary checking and maintenance before you attempt to start the engine.

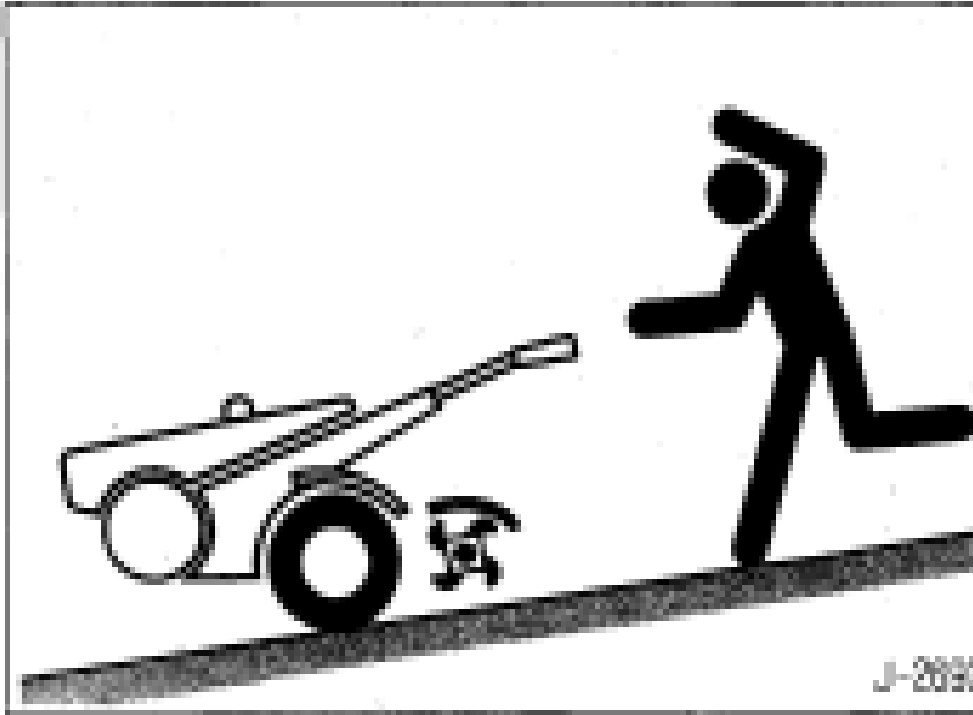

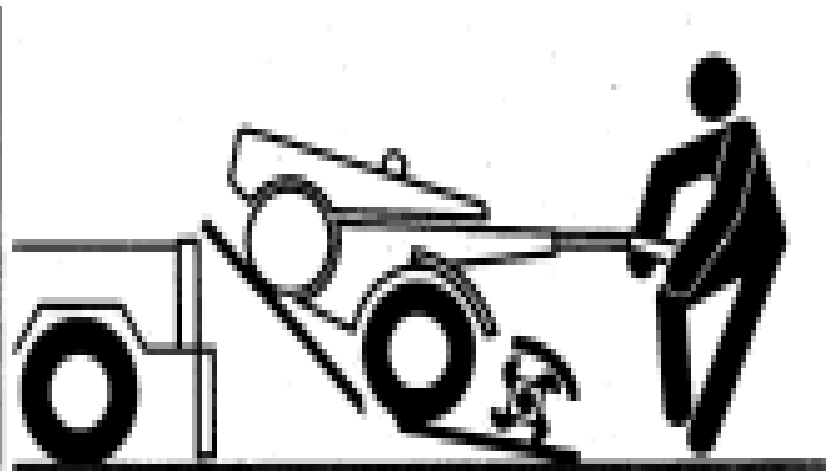

Do not cover the V-belt while the engine is running. This will always injure you any time

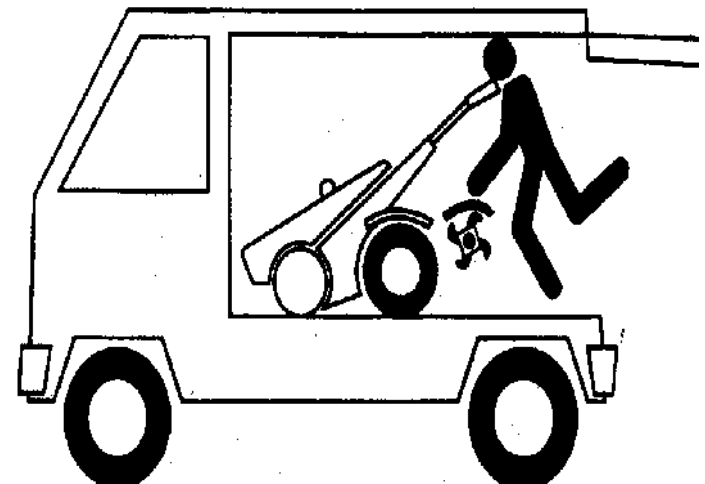

Before you move with the machine always check to see around if any object is hindering you

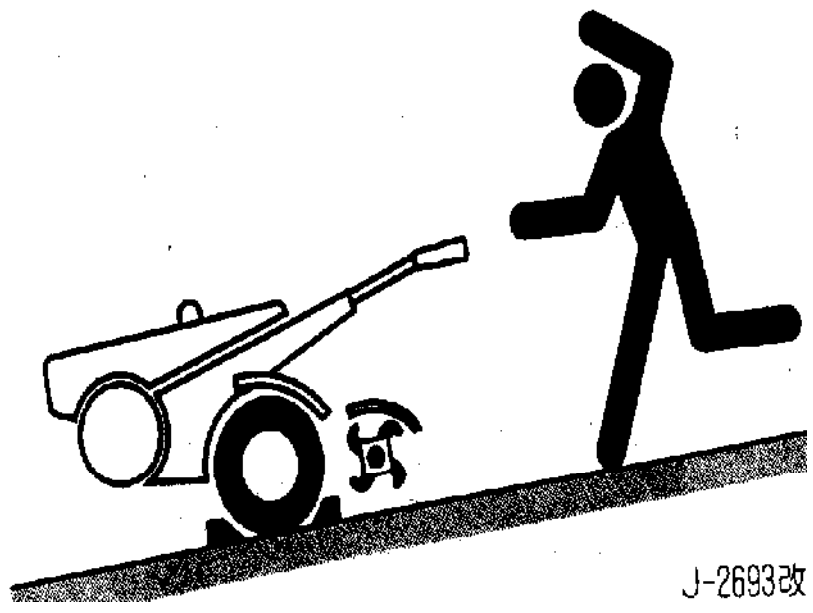

Climbing Transporting machines

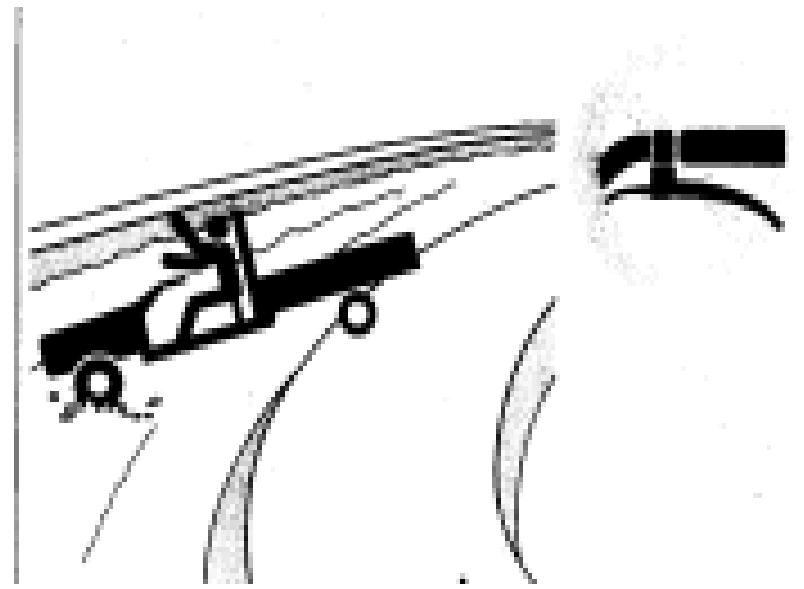

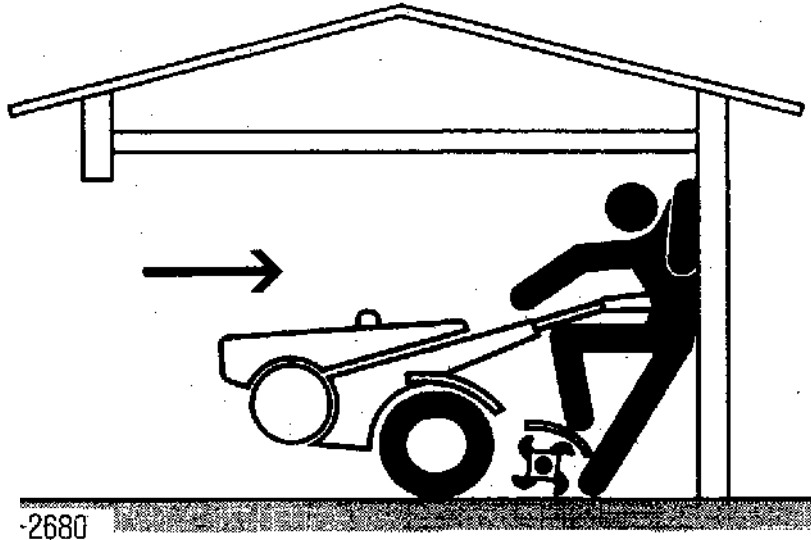

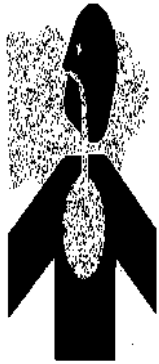

Transporting machine

J-2693改

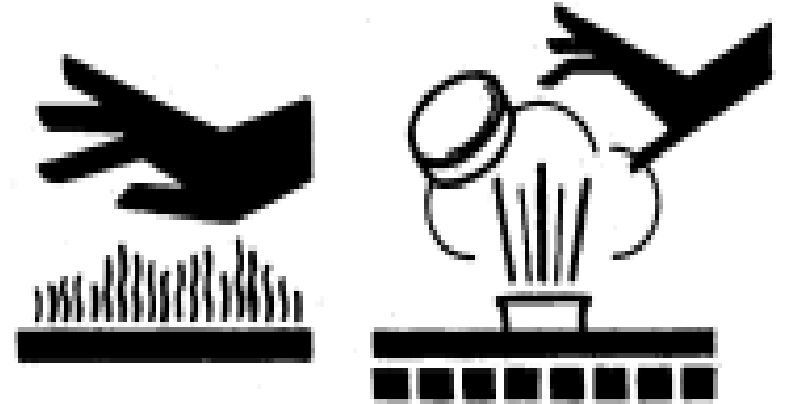

Do not drive front in slope with implements attached

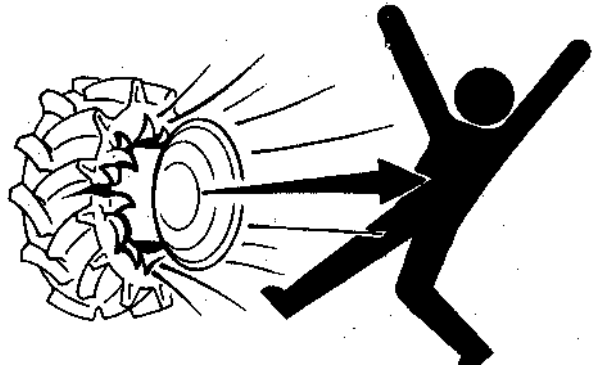

Caution be alert always

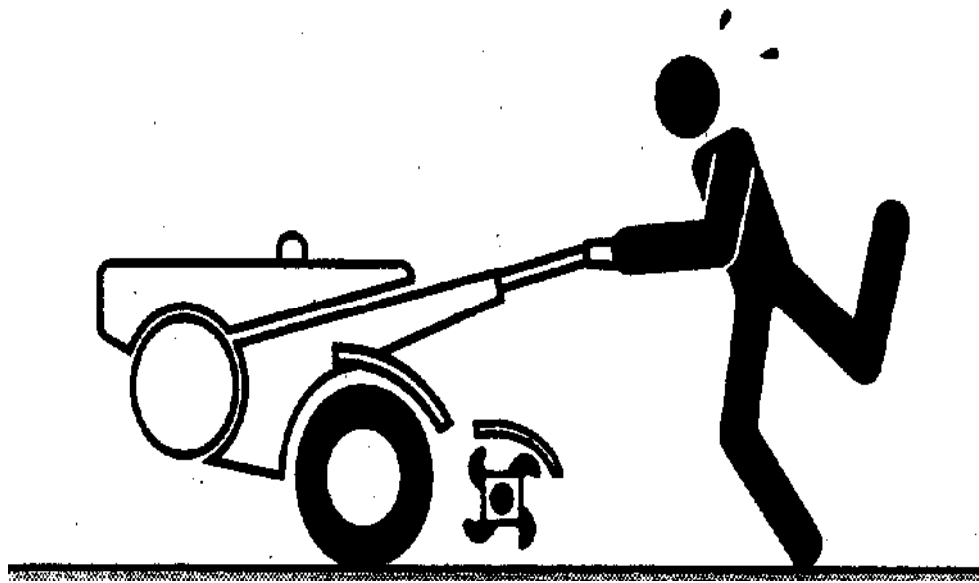

Do not start the engine inside store or House, "smoke is injuries to health"

Check the tire pressure

Out of control "speed limit"
